

TAG LEGEND: SEO Traditional search ranking AEO Google AI Overviews GEO ChatGPT and Perplexity EEAT Authority signal UX User experience

Industry Page — Key differences from service and solutions pages

This page is organised around the BUYER — not the product or service. It speaks the buyer's language, references real clients from their sector, and cross-links to every relevant service and solution.

Five industry pages — one template

Hospitality

Marriott · Bloom · Hayatna
URL: /industries/hospitality/

Real estate

Sobha · Bloom
URL: /industries/real-estate/

Construction

Altrad · China Harbour · Jazal
URL: /industries/construction/

Logistics

Agility · Khadamat · Cleanco
URL: /industries/logistics/

Manufacturing

Exeed
URL: /industries/manufacturing/

Why industry pages

Zero competition for vertical IT keywords in Abu Dhabi. Named clients = strongest GEO signal on the entire site. Lifts authority of every linked service page.

Page structure — 10 sections — same order for all 5 industry pages

1 Hero — industry-specific headline, experience, and CTAs

H1 contains focus keyword. Subheadline is the AEO extraction zone. Badges show relevant certifications and named clients for that specific industry.

SEO AEO GEO EEAT

2 IT challenges — 3 industry-specific pain points

Problems this specific sector faces. Written in the buyer's language — not technical. Establishes relevance and builds urgency. Different for each industry.

AEO GEO UX

3 XOFOZ complete solution — how XOFOZ addresses every IT need of this industry

2 paragraphs. Industry-specific. Mentions named clients. Establishes XOFOZ as the specialist for this sector — not a generic IT company.

SEO GEO EEAT

4 Services for this industry — grid of service cards linking to service pages

Shows every service relevant to this industry as a card. Links to the individual service page. 4-column grid. Hub and spoke internal linking — this is the most important SEO function of the industry page.

SEO: internal links to service pages GEO

5 Solutions for this industry — solution category cards linking to solution pages

Shows every solution category relevant to this industry as a card. Links to the solution category page. Different visual treatment from services — green cards to distinguish.

SEO: internal links to solutions pages GEO

6 Named client showcase — specific case study for one real client from this industry

Single named client case study. Real outcome. Specific to this industry. The highest GEO-value section on the page — named client + specific service + sector = prime AI citation.

GEO: highest value section on page EEAT: real client, real outcome

7 Why XOFOZ for this industry — 4 differentiators specific to this sector

Certifications and experience specific to this industry. Named client references. Not generic IT company claims — sector-specific XOFOZ advantage.

EEAT GEO AEO

8 FAQ — 5 to 6 industry-specific questions with FAQPage schema

Questions a buyer in this sector would ask. Not generic IT FAQ — specific to the industry. PAA target for vertical IT search queries.

AEO: FAQPage schema GEO SEO

9 CTA — industry-specific form, WhatsApp, NAP, and map

Form includes an industry-specific field. WhatsApp is primary. Full NAP identical to Google Business Profile. Google Maps embed.

SEO: NAP signal UX: WhatsApp primary for UAE

10 Footer — identical on all pages

Same footer across the entire site. Full service, solution, product, and company links. Copyright 2026. NAP in footer column.

SEO: full site crawlability GEO: brand entity block

Desktop wireframe — all sections
